Subject: Increase of Non-Registered Medicines Importation Requests

Dear All,

With reference to the above subject matter, please note that we have been noticing there is increase of non-registered medicines importation requests and on the other hand decrease in the submission of new registration dossiers. Also, it has been observed that many medicines temporary approvals have expired, and agents did not submit their dossiers for registration.

Please be aware that NHRA will enforce resolution 32 measures, as per the resolution only medicines for rare and emergency cases and tumours that have no registered alternative will be excluded. In order to avoid delays in releasing your shipment, you should proceed to submitting your dossiers without delay. Submitting your dossiers will permit temp release until registration is completed.

This circular will be effective from date of release.

Previous Government LPOs issued and GCC purchasing orders will be excluded.

Best Regards,

Dr Mariam Athbi Al-Jalahma
Chief Executive Officer
